Swedish-Polish TLC Group is a global leader in production of stairs, steel constructions and temporary protection systems for industry and building sectors.

The Group is also a manufacturer of an innovative equipment used to build high capacity steel storage tanks, which allows for fast and effective realisation of the project while offering noticeable cost reduction.

TLC Group successfully combines Scandinavian knowledge, experience and technology with Polish enterprise, which results in constant development and modernisation of the production plant.

TLC certified by:

- TÜV SÜD Polska no. 2527 for conformity with EN 1090-1 standard.
- TÜV SÜD Polska with EN ISO 3834-2 standard
- TÜV SÜD Management Service GmbH with Integrated Management System of Quality, Environment and OHS (ISO 9001/ ISO 14001/ ISO 45001).

Our construction products are CE marked.

Multiannual international successes in servicing key building and industry sectors investments are the result of cooperation based on strategic partnership and the highest quality of services offered by the TLC Group.

Six co-partnership companies located in Poland, with 9 branches around the country, Sweden, Germany and the UK. The offer of sales and rental includes project, production, transport, assembly and servicing. Fast and efficient service all around the world.

TLC Group employs **over 400 people**. The management and the engineering staff have great knowledge about the market, a wide range of trade relations and a long-time experience in building sector.

In **Construction-technological** office, that is part of the TLC Group's structure, there is a highly-qualified engineering staff. This allows us to offer professional consulting to our clients, versatility in concept creation process and preparation of complex project documentation.

Our **Research and Development** department cooperates with renown science centres in Poland and abroad. High competences of our specialists, constant analysis of market demands and building sector trends allow us to be one step ahead of the competition by developing innovative solutions and products that are compliant with current regulations.

replacement of 90% of the car fleet by electric and hybrid cars by 2023

power from photovoltaic panels

automatic light system, heat pump system

electronic circulation of invoices

gadgets and marketing materials made of recycled plastics

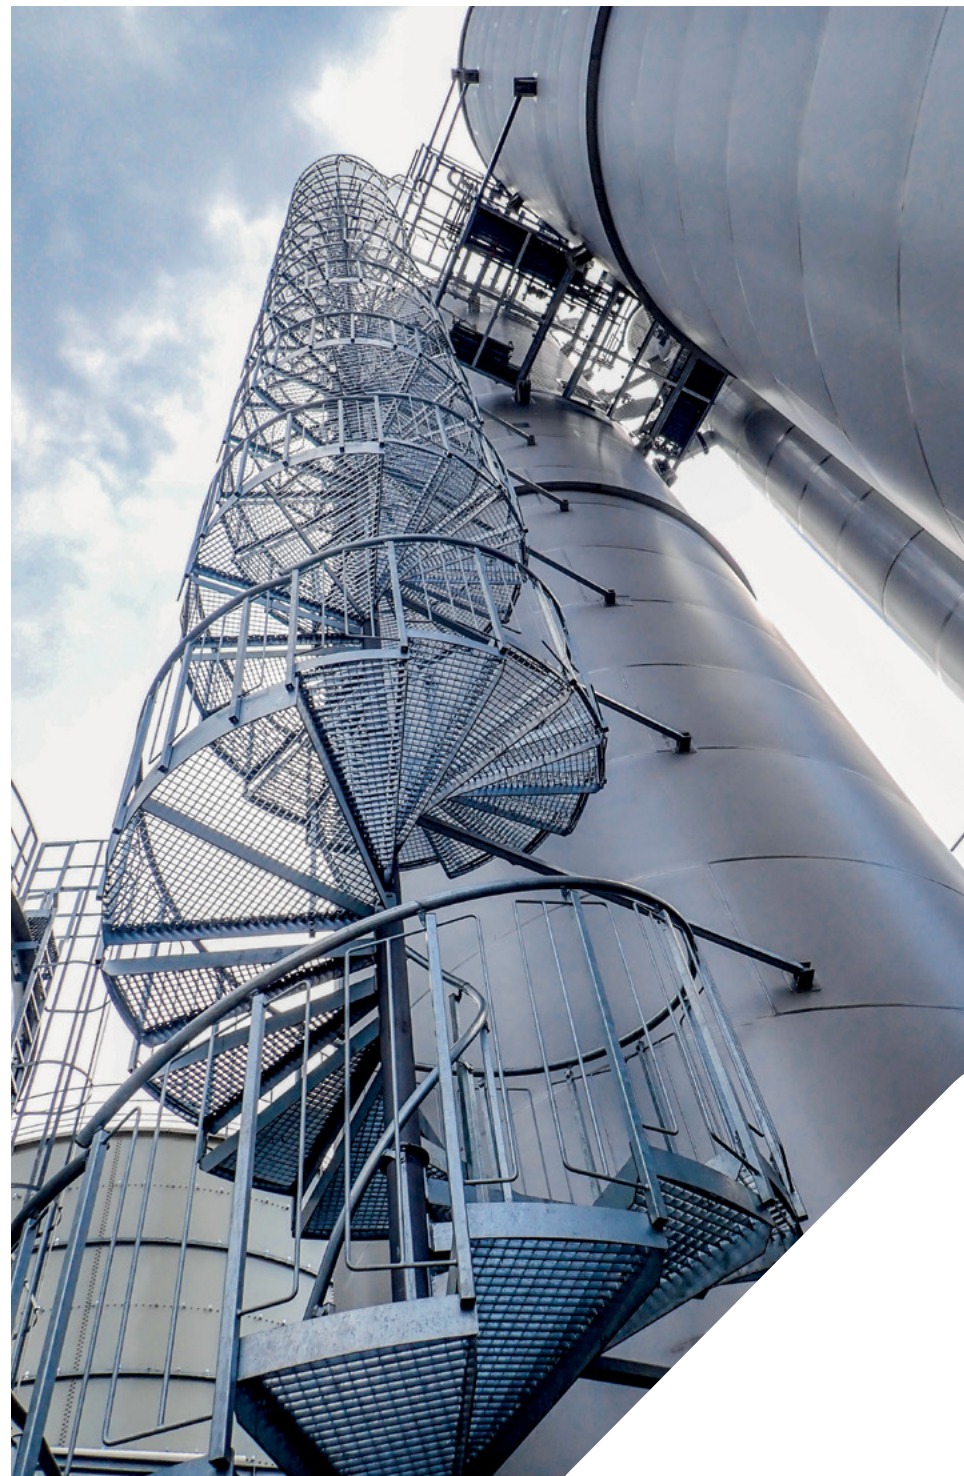

The above points are small, only a small percentage of the green companies. The entire impact of environmental impacts, impacts on the development of one of the main elements of the Group - the idea of Sustainable Development - successfully implemented for years under the slogan **GREEN TLC - WE CARE FOR LIFE.**

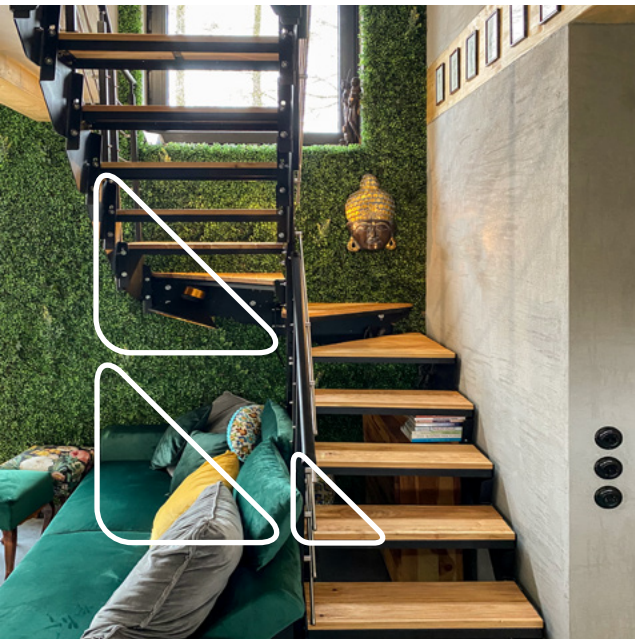

The Group's mission is to maintain persistent and impeccable relations with our business partners by developing product offer and implementing innovative solutions and technologies that improve construction site organisation.

In the upcoming years, **the Group aims** to expand and increase its sales on foreign markets. Therefore, we plan further development, investments and strengthening of the brand abroad by establishing new TLC Group co-partnerships. Focusing on clients' needs, the company aims to reach the optimal level of sales and logistics offers.
